(Option) DF-20C Antenna Head Upgrade Kit
(Option) Radome Kit

Product Overview

The DF-45A was introduced by ASIT to satisfy the need of the law enforcement market for cellular geolocation applications in a low-profile package. For cellular applications, the DF-45A is compatible with popular receivers and software. For those customers who already own a DF-20C purchased from DRT, ASIT sells a DF-45 upgrade kit for the DF-20C.

All items contained herein are controlled under the International Traffic in Arms Regulations. (ITAR) and are subject to U.S. State Department Approval.
