## FACT SHEET: HELICOPTERS

### EXPERIENCE ON ROTARY PLATFORMS

L-3 Display Systems provides a wide range of products that support tactical and special mission rotary wing platforms ranging from specialized high resolution sensor displays to a digital form, fit, function replacement for standard cockpit instruments.

AH-64D TEDAC Gunner's Display

CH-46E Horizontal/Hover Situation Indicator

CH-47 Digital Round Gauges

A/MH-6J Electronic Engine Indicator

SH-60J (Japan) Displays

### L-3 Display Systems Products Supporting Rotary Platforms

- High Resolution (>190 dpi), sunlight readable, NVG compatible monochrome sensor display
- Electronic Engine Indicator that converts legacy engine signals to digital in the Display negating the need for a data converter.
- Electronic Flight Instruments (EFIs) based on a standard product that is easily modified to satisfy specific platform requirements
